

1.3 Implementation Support

Need-based support was offered in the on-field implementation of the following interventions by the partners:

1. Facilitating the adoption of location-specific PoPs by the farmers

2. Setting up small-scale Bio Resource Centres (BRCs)

Support was given to 22 partners for setting up 73 BRCs to improve availability of bio-formulations on time in an accessible place at affordable prices. These units were run by the women SHGs/producer groups. Besides these, support was given to two partners for setting up medium-scale BRCs.

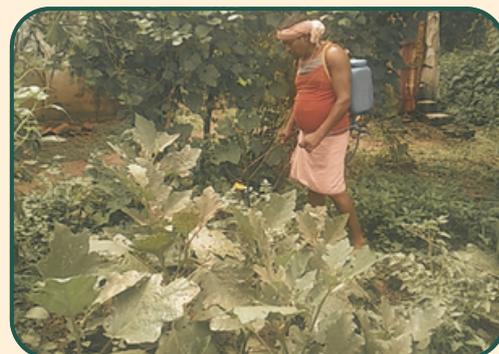

3. Implementing DCS in SPS locations:

On-site support was given to the field team & key farmers on i) developing location-specific diversified cropping systems for the prevalent Kharif and Rabi crops, ii) documenting results & key learnings of the adoption trials.

4. Introduction of waste decomposer & CVR technique of pest management among 25 partners

5. Support for the initiation of new production clusters by a few partners
