

## 2.4 Implementation Support

N+3F has been nudging partners to move forward on the value chain development of pesticide-free produce they are dealing with. Support was offered for

### 1. Introduction of

- a. Hermetic storage technologies.
- b. Tamil Nadu Agricultural University insect traps.
- c. Equipment for quality checking of crop produce.
- d. The spiral grader and solar dryer.

### 2. Establishing small-scale primary processing units covering millets, pulses, groundnut, mustard & spices

### 3. Machine for packing value-added products

### 4. Vending carts to market pesticide-free produce in the local area

### 5. Building market linkages through Buyer-Seller Meet and facilitating interaction with buyers of pesticide-free produce

### 6. Developing customised SOPs by food business operators

### 7. Applying to Grants for the Agroecology Program from IFAD, Harit Bharat Fund & other opportunities.
